Used as a heavy-duty coating over rigid thermal insulation on tanks, lines and equipment where operating temperatures are below ambient summer temperatures.

Heavy-duty vapor barrier coatings are protective materials used in construction and industrial applications to prevent the infiltration of moisture and vapor into buildings, structures, or equipment. These coatings are essential for maintaining the integrity and longevity of various structures. Building owners, architects, and contractors are placing a greater emphasis on the performance of the building envelope. Heavy-duty vapor barrier coatings are a critical component in ensuring that structures are energy-efficient, moisture-resistant, and durable. With a growing awareness of energy conservation and sustainability, there is a trend toward using vapor barrier coatings to enhance insulation and reduce energy consumption. Coatings that improve the insulation value of buildings are in demand.
