A heavy-duty zipper is a robust, durable closure system used in various applications that require a reliable fastening mechanism. It consists of interlocking metal or plastic teeth that securely fasten and separate when the zipper slider is moved. The teeth are larger and stronger than those found in standard zippers, enabling them to withstand more substantial loads, frequent use, and challenging conditions. Heavy-duty zippers are designed for applications that demand extra strength and durability, such as in outdoor gear, tents, luggage, workwear, military equipment, and other products requiring a reliable and long-lasting closure solution.
