A heavy vehicle retarder is a device installed in large vehicles, such as trucks and buses, to assist in slowing down the vehicle without relying solely on traditional brakes. It works by using engine braking or hydraulic resistance to dissipate energy and reduce speed, helping to maintain control, especially on downhill gradients. Retarders enhance braking efficiency, reduce wear on brake components, and improve safety by preventing brake fade during prolonged use. Common types of retarders include exhaust brakes, engine brakes, and hydraulic retarders, each designed to provide additional braking power while ensuring safe operation in heavy vehicle applications.
