Abstracts

The global Heelys market size is predicted to grow from US$ 242 million in 2025 to US$ 219 million in 2032; it is expected to grow at a CAGR of -1.4% from 2026 to 2032.

Heelys originated in the United States. The characteristic of this shoe is that one or more high-quality pulleys are installed on the heel, so that the wearer can perform roller skating on the ground with just a few simple steps. At the same time, heelys are also a kind of multi-functional sports and leisure shoes. They can be used for roller skating activities, or the wheels can be removed and worn as ordinary high-end casual shoes. The pulley design of heelys allows the wearer to easily perform various actions such as sliding, rotating on the spot, sliding backwards, jumping, and flying. These actions not only enrich the form of sports, but also reflect street culture. When roller skating is not needed, the wheels can be easily removed to transform the heelys into a comfortable casual shoe. This design makes heelys suitable for both sports occasions and daily wear. The design of heelys focuses on safety, using high-quality pulleys and a stable sole structure to ensure the stability and safety of the wearer during the sliding process.

United States market for Heelys is estimated to increase from US$ million in 2025 to US$ million by 2032, at a CAGR of % from 2026 through 2032.

China market for Heelys is estimated to increase from US$ million in 2025 to US$ million by 2032, at a CAGR of % from 2026 through 2032.

Europe market for Heelys is estimated to increase from US$ million in 2025 to US$ million by 2032, at a CAGR of % from 2026 through 2032.
