Helicopter Underwater Egress Training (also known as Helicopter Underwater Escape Training) is training provided to helicopter flight crews, offshore oil and gas industry, law enforcement personnel, and military personnel who are regularly transported by helicopters over water. As the name implies, the purpose of this training is to prepare passengers and crew for an emergency evacuation or egress in the event of a crash landing on water.

Helicopter Underwater Escape Training (HUET) is a highly specialized market focused on providing critical emergency survival skills to aircrew and offshore personnel.

The continued demand for global offshore oil and gas activities, the aviation industry's focus on safety, and increasingly stringent safety regulations together form the cornerstones of market growth.

Future market development will benefit significantly from technological innovation. The introduction of virtual reality (VR) and augmented reality (AR) technologies can create highly realistic and risk-free training environments, allowing trainees to better master skills through an immersive experience.

With the increase in offshore exploration and production activities in developing countries in Africa, Latin America, and the Asia-Pacific region, demand for HUET training is rapidly rising, creating a new market growth point.
