The global Helium for Welding market size is predicted to grow from US$ 1469 million in 2025 to US$ 2110 million in 2032; it is expected to grow at a CAGR of 5.4% from 2026 to 2032.

?Helium for Welding? refers to the application of helium gas as a shielding or inert gas in welding processes, particularly in gas tungsten arc welding (GTAW/TIG) and gas metal arc welding (GMAW/MIG). Its high thermal conductivity and inert properties prevent oxidation and contamination of the weld pool, ensuring cleaner, stronger joints in materials like aluminum, stainless steel, and high-temperature alloys. Helium is often mixed with argon to enhance arc stability and penetration depth, making it ideal for thick materials or high-speed welding in aerospace, automotive, and precision manufacturing. Its ability to produce deep, narrow welds with reduced spatter is critical for applications requiring structural integrity and high-quality finishes.

United States market for Helium for Welding is estimated to increase from US$ million in 2025 to US$ million by 2032, at a CAGR of % from 2026 through 2032.

China market for Helium for Welding is estimated to increase from US$ million in 2025 to US$ million by 2032, at a CAGR of % from 2026 through 2032.

Europe market for Helium for Welding is estimated to increase from US$ million in 2025 to US$ million by 2032, at a CAGR of % from 2026 through 2032.

Global key Helium for Welding players cover Linde, Messer, Taiyo Nippon Sanso, Air Liquide, Air Products, etc. In terms of revenue, the global two largest companies occupied for a share nearly % in 2025.
