Abstracts

The global Helium-free MRI Magnet market size is predicted to grow from US\$ 168 million in 2025 to US\$ 266 million in 2032; it is expected to grow at a CAGR of 6.6% from 2026 to 2032.

Helium-free MRI Magnet refers to the main magnetic-field generation component used in magnetic resonance imaging systems that substantially eliminates dependence on conventional large-volume liquid-helium cooling. The product primarily uses conduction cooling, cryocooler-based cooling, or sealed-for-life magnet architectures to maintain the superconducting operating environment while reducing helium inventory, replenishment requirements, installation constraints, and cryogenic infrastructure dependence. Depending on system design, the market covers Low-field MRI Magnet (<1.0 T), Mid-field MRI Magnet (1.0–1.5 T), High-field MRI Magnet (1.5–3.0 T), and Ultra-high-field MRI Magnet (>3.0 T). Helium-free MRI Magnet combines superconducting coil design, cryogenic engineering, thermal management, quench protection, magnetic shielding, and field-homogeneity technologies. Its downstream applications primarily include clinical diagnosis, preclinical research, scientific research, and veterinary medicine, where stable magnetic-field performance, reduced cryogenic maintenance, and greater flexibility in MRI installation and lifecycle operation are increasingly important.

Key Findings

High-field 1.5–3.0 T magnets represent a key commercial field-strength segment for Helium-free MRI Magnet

Clinical diagnosis is the principal downstream application for commercial Helium-free

MRI Magnet deployment

Sealed-for-life and conduction-cooled architectures are reducing dependence on conventional high-volume liquid-helium magnet systems

Helium-free magnet technology is expanding from clinical MRI toward preclinical and scientific research applications

Reduced helium dependence is becoming an important consideration in MRI installation and lifecycle management

Market Trends

Helium-free MRI Magnet technology is evolving from conventional superconducting architectures dependent on large liquid-helium reservoirs toward low-helium sealed, conduction-cooled, and cryocooler-cooled designs. Product development increasingly emphasizes lower cryogen inventory, simplified siting requirements, enhanced thermal stability, and improved recovery capability following abnormal operating conditions. In clinical MRI, this transition is particularly relevant to 1.5–3.0 T systems, where manufacturers must balance field strength, image quality, bore design, magnet weight, cooling efficiency, and lifecycle reliability. Meanwhile, advances in superconducting materials, cryocooler efficiency, thermal conduction structures, and magnet protection are supporting further development of true cryogen-free architectures. The technology is also extending into preclinical and scientific research systems, where compact dry magnets and higher-field configurations can reduce dependence on specialized cryogenic infrastructure.

Market Dynamics

Drivers

The primary market driver is the MRI industry's need to reduce operational dependence on liquid helium. Conventional superconducting MRI magnets require sophisticated cryogenic systems and expose healthcare facilities to helium supply, replenishment, siting, and lifecycle maintenance considerations. Helium-free MRI Magnet architectures can substantially reduce the quantity of helium required or eliminate routine helium replenishment, thereby improving installation flexibility and simplifying magnet lifecycle management. Continued deployment of MRI capacity, particularly in facilities where conventional cryogenic infrastructure is difficult or costly to establish, further supports

adoption.

Restraints

Technical complexity remains a major constraint. Maintaining superconducting operating temperatures without a conventional large-volume liquid-helium reservoir requires highly reliable cryocoolers, thermal conduction structures, vacuum insulation, superconducting coils, and protection systems. Clinical MRI applications additionally demand stringent magnetic-field homogeneity, long-term stability, low vibration, and high system availability. Development and qualification costs are therefore significant, while the long operating life expected from MRI magnets means that healthcare institutions generally require extensive reliability validation before adopting substantially different magnet architectures.

Opportunities

The strongest opportunity lies in extending helium-free architectures across mainstream clinical MRI platforms while improving accessibility in hospitals, outpatient imaging centers, and locations with limited cryogenic infrastructure. Further opportunities exist in compact MRI, dedicated imaging systems, veterinary imaging, and preclinical research, where reduced installation requirements can have substantial economic value. Improvements in superconducting materials and conduction-cooling technologies may also enable broader field-strength coverage, creating opportunities for higher-field research systems and new magnet configurations with lower helium dependence.

Challenges

Long-term reliability, thermal stability, quench management, cryocooler durability, and serviceability remain important engineering challenges. Different manufacturers also use different technical definitions for helium-free, cryogen-free, sealed-for-life, and ultra-low-helium architectures, which can complicate direct product comparison. For suppliers, another challenge is achieving competitive manufacturing economics while meeting demanding requirements for magnetic-field uniformity, superconducting coil precision, shielding, vibration control, patient safety, and multi-year operational stability.

Industry Chain Analysis

The upstream industry chain for Helium-free MRI Magnet consists primarily of superconducting wire and related conductor materials, high-purity structural and thermal-management materials, cryocoolers, vacuum components, power and protection

devices, magnetic shielding materials, precision mechanical components, and specialized manufacturing equipment. Magnet manufacturing represents the technically intensive midstream stage, involving superconducting coil winding, structural engineering, cryogenic and thermal design, vacuum integration, magnetic-field correction and shimming, quench protection, testing, and system qualification. The magnet is subsequently integrated with gradient coils, RF systems, electronics, patient handling systems, control software, and imaging reconstruction platforms to form a complete MRI system.

Downstream demand comes from clinical MRI manufacturers and healthcare institutions, as well as preclinical imaging, scientific research, and veterinary imaging markets. Value creation is concentrated in superconducting magnet design, cryogenic architecture, manufacturing precision, field homogeneity, reliability, and lifecycle engineering capability. Compared with conventional MRI magnets, Helium-free MRI Magnet places greater technical emphasis on heat transfer efficiency, cryocooler integration, thermal stability, and protection against loss of superconducting conditions. These requirements create relatively high technological and manufacturing barriers and make long-term engineering validation an important component of commercialization.

Segment Insights

By cooling architecture, Conduction-cooled MRI Magnet and Cryocooler-cooled MRI Magnet represent important routes toward reducing or eliminating reliance on conventional liquid-helium reservoirs, while Sealed-for-life MRI Magnet provides another commercial route by retaining only a limited sealed cryogen inventory designed to minimize routine replenishment. The architectures differ in thermal design, cryogenic configuration, maintenance requirements, and technical maturity, allowing manufacturers to address different MRI system requirements.

By magnetic field strength, High-field MRI Magnet (1.5–3.0 T) is particularly important for clinical commercialization because 1.5 T and 3.0 T systems occupy central positions in mainstream diagnostic imaging. Low-field and Mid-field products can support compact or application-specific MRI configurations, while Ultra-high-field MRI Magnet (>3.0 T) is more closely associated with preclinical imaging, brain science, advanced medical imaging, and other research applications. The ability to extend helium-free cooling toward higher magnetic fields represents an important area of technological development.

Downstream Market Opportunities

Clinical diagnosis represents the primary downstream opportunity for Helium-free MRI Magnet, particularly across neurological, spinal, musculoskeletal, abdominal, and cardiovascular MRI examinations. Reduced helium dependence can improve installation flexibility and lifecycle management for hospitals and imaging centers. Preclinical research creates additional demand through small-animal imaging, disease models, drug development, and in vivo imaging, while scientific research requires specialized magnets for brain science, functional imaging, medical imaging research, and ultra-high-field experiments. Veterinary medicine provides another application opportunity as advanced diagnostic imaging expands across companion-animal and specialized veterinary facilities.

Regional Insights

North America, Europe, and Asia Pacific constitute the principal commercial regions for Helium-free MRI Magnet, although their demand structures differ. North America and Europe have mature MRI installed bases and strong demand for system replacement, lifecycle cost optimization, and advanced clinical imaging, creating favorable conditions for sealed and low-helium magnet architectures. These markets also contain significant research infrastructure supporting higher-field and specialized magnet applications.

Asia Pacific combines expanding healthcare imaging capacity with a substantial MRI manufacturing and supply-chain base. China, Japan, and other regional markets provide opportunities through hospital imaging infrastructure expansion, domestic MRI equipment development, and localization of superconducting magnet technologies. Regional growth opportunities increasingly depend not only on MRI system demand but also on the ability to localize superconducting materials, cryogenic components, magnet manufacturing, and after-sales engineering capabilities.

Competitive Landscape Analysis

The Helium-free MRI Magnet market has relatively high technical barriers because suppliers must combine expertise in superconducting magnet engineering, cryogenics, precision manufacturing, magnetic-field control, system integration, and long-term reliability. Competition involves both vertically integrated MRI manufacturers developing proprietary magnet architectures for their own systems and specialized superconducting magnet manufacturers supplying magnets or magnet technologies to external customers. Competitive differentiation increasingly centers on helium inventory, cooling architecture, field strength, magnet footprint and weight, field homogeneity, quench management, installation requirements, reliability, and lifecycle serviceability. In

mainstream clinical applications, suppliers capable of industrializing helium-independent or sealed-for-life technologies at 1.5–3.0 T have an important commercialization advantage, while specialized magnet manufacturers retain opportunities in preclinical, scientific research, and customized higher-field systems.

Report Scope

LP Information, Inc. (LPI) ' newest research report, the “Helium-free MRI Magnet Industry Forecast” looks at past sales and reviews total world Helium-free MRI Magnet sales in 2025, providing a comprehensive analysis by region and market sector of projected Helium-free MRI Magnet sales for 2026 through 2032. With Helium-free MRI Magnet sales broken down by region, market sector and sub-sector, this report provides a detailed analysis in US\$ millions of the world Helium-free MRI Magnet industry.

This Insight Report provides a comprehensive analysis of the global Helium-free MRI Magnet landscape and highlights key trends related to product segmentation, company formation, revenue, and market share, latest development, and M&A activity. This report also analyzes the strategies of leading global companies with a focus on Helium-free MRI Magnet portfolios and capabilities, market entry strategies, market positions, and geographic footprints, to better understand these firms' unique position in an accelerating global Helium-free MRI Magnet market.

This Insight Report evaluates the key market trends, drivers, and affecting factors shaping the global outlook for Helium-free MRI Magnet and breaks down the forecast by Type, by Application, geography, and market size to highlight emerging pockets of opportunity. With a transparent methodology based on hundreds of bottom-up qualitative and quantitative market inputs, this study forecast offers a highly nuanced view of the current state and future trajectory in the global Helium-free MRI Magnet.

This report presents a comprehensive overview, market shares, and growth opportunities of Helium-free MRI Magnet market by product type, application, key manufacturers and key regions and countries.

Market Segmentation

Segmentation by Type:

Conduction-cooled MRI Magnet

Cryocooler-cooled MRI Magnet

Sealed-for-life MRI Magnet

Segmentation by Field Strength:

Low-field MRI Magnet (<1.0 T)

Mid-field MRI Magnet (1.0–<1.5 T)

High-field MRI Magnet (1.5–3.0 T)

Ultra-high-field MRI Magnet (>3.0 T)

Segmentation by Application:

Clinical Diagnosis (MRI Examinations of the Nervous System, Spine, Musculoskeletal System, Abdomen, Cardiovascular System, etc.)

Preclinical Research (Small Animal Imaging, Disease Models, Drug Development, In Vivo Imaging)

Scientific Research (Brain Science, Functional Imaging, Medical Imaging Research, Ultra-High Field MRI Research)

Veterinary Medicine (MRI Diagnosis of Pets, Companion Animals, and Large Animals)

This report also splits the market by region:

Americas

United States

Canada

Mexico

Brazil

APAC

China

Japan

Korea

Southeast Asia

India

Australia

Europe

Germany

France

UK

Italy

Russia

Middle East & Africa

Egypt

South Africa

Israel

Turkey

GCC Countries

The below companies that are profiled have been selected based on inputs gathered from primary experts and analysing the company's coverage, product portfolio, its market penetration.

Scientific Magnetics

Bruker

JEOL Ltd

Cryomagnetics

Philips Healthcare

Fujifilm Healthcare

Tesla Engineering

American Magnetics

Siemens Healthineers

ASG Superconductors

Oxford Instruments

Huate Magnetolectric

Mediso

Key Questions Addressed in this Report

What is the 10-year outlook for the global Helium-free MRI Magnet market?

What factors are driving Helium-free MRI Magnet market growth, globally and by region?

Which technologies are poised for the fastest growth by market and region?

How do Helium-free MRI Magnet market opportunities vary by end market size?

How does Helium-free MRI Magnet break out by Type, by Application?

Contents

1 SCOPE OF THE REPORT

- 1.1 Market Introduction
- 1.2 Years Considered
- 1.3 Research Objectives
- 1.4 Market Research Methodology
- 1.5 Research Process and Data Source
- 1.6 Economic Indicators
- 1.7 Currency Considered
- 1.8 Market Estimation Caveats

2 EXECUTIVE SUMMARY

- 2.1 World Market Overview
 - 2.1.1 Global Helium-free MRI Magnet Annual Sales 2021-2032
 - 2.1.2 World Current & Future Analysis for Helium-free MRI Magnet by Geographic Region, 2021, 2025 & 2032
 - 2.1.3 World Current & Future Analysis for Helium-free MRI Magnet by Country/Region, 2021, 2025 & 2032
- 2.2 Helium-free MRI Magnet Segment by Type
 - 2.2.1 Conduction-cooled MRI Magnet
 - 2.2.2 Cryocooler-cooled MRI Magnet
 - 2.2.3 Sealed-for-life MRI Magnet
 - 2.2.4 Helium-free MRI Magnet Sales by Type
 - 2.2.4.1 Global Helium-free MRI Magnet Sales Market Share by Type (2021-2026)
 - 2.2.4.2 Global Helium-free MRI Magnet Revenue and Market Share by Type (2021-2026)
 - 2.2.4.3 Global Helium-free MRI Magnet Sale Price by Type (2021-2026)
- 2.3 Helium-free MRI Magnet Segment by Field Strength
 - 2.3.1 Low-field MRI Magnet (<1.0 T)
 - 2.3.2 Mid-field MRI Magnet (1.0–<1.5 T)
 - 2.3.3 High-field MRI Magnet (1.5–3.0 T)
 - 2.3.4 Ultra-high-field MRI Magnet (>3.0 T)
 - 2.3.5 Helium-free MRI Magnet Sales by Field Strength
 - 2.3.5.1 Global Helium-free MRI Magnet Sales Market Share by Field Strength (2021-2026)
 - 2.3.5.2 Global Helium-free MRI Magnet Revenue and Market Share by Field Strength

(2021-2026)

2.3.5.3 Global Helium-free MRI Magnet Sale Price by Field Strength (2021-2026)

2.4 Helium-free MRI Magnet Segment by Application

2.4.1 Clinical Diagnosis (MRI Examinations of the Nervous System, Spine, Musculoskeletal System, Abdomen, Cardiovascular System, etc.)

2.4.2 Preclinical Research (Small Animal Imaging, Disease Models, Drug Development, In Vivo Imaging)

2.4.3 Scientific Research (Brain Science, Functional Imaging, Medical Imaging Research, Ultra-High Field MRI Research)

2.4.4 Veterinary Medicine (MRI Diagnosis of Pets, Companion Animals, and Large Animals)

2.4.5 Helium-free MRI Magnet Sales by Application

2.4.5.1 Global Helium-free MRI Magnet Sale Market Share by Application

(2021-2026)

2.4.5.2 Global Helium-free MRI Magnet Revenue and Market Share by Application

(2021-2026)

2.4.5.3 Global Helium-free MRI Magnet Sale Price by Application (2021-2026)

3 GLOBAL BY COMPANY

3.1 Global Helium-free MRI Magnet Breakdown Data by Company

3.1.1 Global Helium-free MRI Magnet Annual Sales by Company (2021-2026)

3.1.2 Global Helium-free MRI Magnet Sales Market Share by Company (2021-2026)

3.2 Global Helium-free MRI Magnet Annual Revenue by Company (2021-2026)

3.2.1 Global Helium-free MRI Magnet Revenue by Company (2021-2026)

3.2.2 Global Helium-free MRI Magnet Revenue Market Share by Company

(2021-2026)

3.3 Global Helium-free MRI Magnet Sale Price by Company

3.4 Key Manufacturers Helium-free MRI Magnet Producing Area Distribution, Sales Area, Product Type

3.4.1 Key Manufacturers Helium-free MRI Magnet Product Location Distribution

3.4.2 Players Helium-free MRI Magnet Products Offered

3.5 Market Concentration Rate Analysis

3.5.1 Competition Landscape Analysis

3.5.2 Concentration Ratio (CR3, CR5 and CR10) & (2024-2026)

3.6 New Products and Potential Entrants

3.7 Market M&A Activity & Strategy

4 WORLD HISTORIC REVIEW FOR HELIUM-FREE MRI MAGNET BY GEOGRAPHIC

REGION

4.1 World Historic Helium-free MRI Magnet Market Size by Geographic Region (2021-2026)

4.1.1 Global Helium-free MRI Magnet Annual Sales by Geographic Region (2021-2026)

4.1.2 Global Helium-free MRI Magnet Annual Revenue by Geographic Region (2021-2026)

4.2 World Historic Helium-free MRI Magnet Market Size by Country/Region (2021-2026)

4.2.1 Global Helium-free MRI Magnet Annual Sales by Country/Region (2021-2026)

4.2.2 Global Helium-free MRI Magnet Annual Revenue by Country/Region (2021-2026)

4.3 Americas Helium-free MRI Magnet Sales Growth

4.4 APAC Helium-free MRI Magnet Sales Growth

4.5 Europe Helium-free MRI Magnet Sales Growth

4.6 Middle East & Africa Helium-free MRI Magnet Sales Growth

5 AMERICAS

5.1 Americas Helium-free MRI Magnet Sales by Country

5.1.1 Americas Helium-free MRI Magnet Sales by Country (2021-2026)

5.1.2 Americas Helium-free MRI Magnet Revenue by Country (2021-2026)

5.2 Americas Helium-free MRI Magnet Sales by Type (2021-2026)

5.3 Americas Helium-free MRI Magnet Sales by Application (2021-2026)

5.4 United States

5.5 Canada

5.6 Mexico

5.7 Brazil

6 APAC

6.1 APAC Helium-free MRI Magnet Sales by Region

6.1.1 APAC Helium-free MRI Magnet Sales by Region (2021-2026)

6.1.2 APAC Helium-free MRI Magnet Revenue by Region (2021-2026)

6.2 APAC Helium-free MRI Magnet Sales by Type (2021-2026)

6.3 APAC Helium-free MRI Magnet Sales by Application (2021-2026)

6.4 China

6.5 Japan

6.6 South Korea

6.7 Southeast Asia

6.8 India

6.9 Australia

6.10 China Taiwan

7 EUROPE

7.1 Europe Helium-free MRI Magnet by Country

7.1.1 Europe Helium-free MRI Magnet Sales by Country (2021-2026)

7.1.2 Europe Helium-free MRI Magnet Revenue by Country (2021-2026)

7.2 Europe Helium-free MRI Magnet Sales by Type (2021-2026)

7.3 Europe Helium-free MRI Magnet Sales by Application (2021-2026)

7.4 Germany

7.5 France

7.6 UK

7.7 Italy

7.8 Russia

8 MIDDLE EAST & AFRICA

8.1 Middle East & Africa Helium-free MRI Magnet by Country

8.1.1 Middle East & Africa Helium-free MRI Magnet Sales by Country (2021-2026)

8.1.2 Middle East & Africa Helium-free MRI Magnet Revenue by Country (2021-2026)

8.2 Middle East & Africa Helium-free MRI Magnet Sales by Type (2021-2026)

8.3 Middle East & Africa Helium-free MRI Magnet Sales by Application (2021-2026)

8.4 Egypt

8.5 South Africa

8.6 Israel

8.7 Turkey

8.8 GCC Countries

9 MARKET DRIVERS, CHALLENGES AND TRENDS

9.1 Market Drivers & Growth Opportunities

9.2 Market Challenges & Risks

9.3 Industry Trends

10 MANUFACTURING COST STRUCTURE ANALYSIS

- 10.1 Raw Material and Suppliers
- 10.2 Manufacturing Cost Structure Analysis of Helium-free MRI Magnet
- 10.3 Manufacturing Process Analysis of Helium-free MRI Magnet
- 10.4 Industry Chain Structure of Helium-free MRI Magnet

11 MARKETING, DISTRIBUTORS AND CUSTOMER

- 11.1 Sales Channel
 - 11.1.1 Direct Channels
 - 11.1.2 Indirect Channels
- 11.2 Helium-free MRI Magnet Distributors
- 11.3 Helium-free MRI Magnet Customer

12 WORLD FORECAST REVIEW FOR HELIUM-FREE MRI MAGNET BY GEOGRAPHIC REGION

- 12.1 Global Helium-free MRI Magnet Market Size Forecast by Region
 - 12.1.1 Global Helium-free MRI Magnet Forecast by Region (2027-2032)
 - 12.1.2 Global Helium-free MRI Magnet Annual Revenue Forecast by Region (2027-2032)
- 12.2 Americas Forecast by Country (2027-2032)
- 12.3 APAC Forecast by Region (2027-2032)
- 12.4 Europe Forecast by Country (2027-2032)
- 12.5 Middle East & Africa Forecast by Country (2027-2032)
- 12.6 Global Helium-free MRI Magnet Forecast by Type (2027-2032)
- 12.7 Global Helium-free MRI Magnet Forecast by Application (2027-2032)

13 KEY PLAYERS ANALYSIS

- 13.1 Scientific Magnetix
 - 13.1.1 Scientific Magnetix Company Information
 - 13.1.2 Scientific Magnetix Helium-free MRI Magnet Product Portfolios and Specifications
 - 13.1.3 Scientific Magnetix Helium-free MRI Magnet Sales, Revenue, Price and Gross Margin (2021-2026)
 - 13.1.4 Scientific Magnetix Main Business Overview
 - 13.1.5 Scientific Magnetix Latest Developments
- 13.2 Bruker
 - 13.2.1 Bruker Company Information

- 13.2.2 Bruker Helium-free MRI Magnet Product Portfolios and Specifications
- 13.2.3 Bruker Helium-free MRI Magnet Sales, Revenue, Price and Gross Margin (2021-2026)
- 13.2.4 Bruker Main Business Overview
- 13.2.5 Bruker Latest Developments
- 13.3 JEOL Ltd
 - 13.3.1 JEOL Ltd Company Information
 - 13.3.2 JEOL Ltd Helium-free MRI Magnet Product Portfolios and Specifications
 - 13.3.3 JEOL Ltd Helium-free MRI Magnet Sales, Revenue, Price and Gross Margin (2021-2026)
 - 13.3.4 JEOL Ltd Main Business Overview
 - 13.3.5 JEOL Ltd Latest Developments
- 13.4 Cryomagnetics
 - 13.4.1 Cryomagnetics Company Information
 - 13.4.2 Cryomagnetics Helium-free MRI Magnet Product Portfolios and Specifications
 - 13.4.3 Cryomagnetics Helium-free MRI Magnet Sales, Revenue, Price and Gross Margin (2021-2026)
 - 13.4.4 Cryomagnetics Main Business Overview
 - 13.4.5 Cryomagnetics Latest Developments
- 13.5 Philips Healthcare
 - 13.5.1 Philips Healthcare Company Information
 - 13.5.2 Philips Healthcare Helium-free MRI Magnet Product Portfolios and Specifications
 - 13.5.3 Philips Healthcare Helium-free MRI Magnet Sales, Revenue, Price and Gross Margin (2021-2026)
 - 13.5.4 Philips Healthcare Main Business Overview
 - 13.5.5 Philips Healthcare Latest Developments
- 13.6 Fujifilm Healthcare
 - 13.6.1 Fujifilm Healthcare Company Information
 - 13.6.2 Fujifilm Healthcare Helium-free MRI Magnet Product Portfolios and Specifications
 - 13.6.3 Fujifilm Healthcare Helium-free MRI Magnet Sales, Revenue, Price and Gross Margin (2021-2026)
 - 13.6.4 Fujifilm Healthcare Main Business Overview
 - 13.6.5 Fujifilm Healthcare Latest Developments
- 13.7 Tesla Engineering
 - 13.7.1 Tesla Engineering Company Information
 - 13.7.2 Tesla Engineering Helium-free MRI Magnet Product Portfolios and Specifications

- 13.7.3 Tesla Engineering Helium-free MRI Magnet Sales, Revenue, Price and Gross Margin (2021-2026)
- 13.7.4 Tesla Engineering Main Business Overview
- 13.7.5 Tesla Engineering Latest Developments
