HEPA (High Efficiency Particulate Air) filters are filters with a great capacity to filter small particles (really tiny ones!). HEPA filters remove more than 99.9% of the particles from the air stream that passes through them. These particles can be allergens, viruses, bacteria, chemical compounds, dust and many more. This is of great help for people with asthma, allergies or those who suffer from respiratory problems. These types of filters are becoming very important during the COVID-19 crisis by helping to reduce the virus indoors, thus reducing the spread of the virus.
