Hernia is a condition in which a tissue, organ, or surface of an organ bulges through the weak area of a muscle. It is commonly seen in the abdomen area. Smoking, poor nutrition, lifting heavy objects, malformation of abdominal wall, obesity, and congenital defects are the risk factors associated with hernia. Hernia repair devices can be classified into mesh products and fixation devices.

The increasing demand for advanced lightweight mesh products is one of the key drivers for the market’s growth until the end of 2023. The demand for advanced lightweight mesh surgery products is increasing due to the widespread adoption of tension-free hernia repair procedures. These products are used to restore the natural connection between muscle and tissue in the abdomen. A large number of physicians
