A hex nipple is a type of threaded pipe fitting featuring a hexagonal center, facilitating the use of a wrench for tightening, with male threads on both ends. This fitting is commonly utilized in general piping systems for water, oil, steam, air, and gas, enabling the connection of pipe fittings and equipment with male threads. The term "nipple" is defined as a pipe fitting with male threads cut at both ends of a straight shaft.

The center portion of a nipple does not have to be strictly hexagonal. For nominal diameters larger than 3/4B (20A), both hexagonal and octagonal shapes are acceptable.
