The global Hexaphenoxycyclotriphosphazene (HPCTP) Flame Retardant market size is predicted to grow from US\$ 504 million in 2025 to US\$ 663 million in 2031; it is expected to grow at a CAGR of 4.7% from 2025 to 2031.

HPCTP is an added halogen-free flame retardant, mainly used in PC/PC/ABS resin and PPO, nylon, epoxy, FCCL, LED, powder coating, embedding material, high molecular material, etc. Hexaphenoxycyclotriphosphazene owns outstanding hydrolytic resistance, mechanical property, which can enhance the adding value of products and provide excellent fireproof effect.

Plastics and chemical fibers are polymers with combustible and flammable properties, so the research and application of flame-retardant polymer materials has become an important way to protect human life and property safety. At present, the development of flame retardant materials is mainly realized by adding flame retardants to the material matrix, flame retardant materials require flame retardant smoke suppression, self-extinguishing and anti-drip properties. Flame retardants can be divided into two categories, inorganic flame retardants and organic flame retardants. Inorganic flame retardants are mainly metal magnesium, aluminum, tin, boron hydroxide or metal salts, organic flame retardants are mainly halogenated, nitrogen, phosphorus and silicon organic compounds or their mixtures. The consumption of flame retardants has now jumped to the second place of plastic additives. According to our research, the global market size of flame retardants in 2022 is about to reach 8 billion U.S. dollars. At present, aluminum hydroxide, bromine and phosphorus flame retardants are the main ones. The United States, Europe, due to flame retardant policies and regulations demand-driven, its flame retardant market started earlier, since 2005, the flame retardant market gradually transferred to the Asian region. From the point of view of

application, wire and cable, electrical and electronic appliances, automobiles and buildings are the most important end-use demand for flame retardants.
