The facial care industry includes goods and devices used to enhance the appearance of facial tissues or parts of the face, such as the lips, nose, eyes or ears. The global facial care industry is expanding owing to rising consumer demand for high-tech cosmetics and health concerns. The demand for facial treatments by women to look more attractive and younger and the increasing sophistication of facial treatment techniques are the key drivers for the growth in sales in the market. In addition, rising health concerns and demand for advanced, professional cosmetics also contribute to the growth of market revenue. In contrast, rising demand from working women in developed countries and rising number of dermatology and aesthetic clinics with improved infrastructure are expected to drive market revenue growth. Spending on maintaining your appearance and caring for your skin is on the rise due to the increase in disposable income. In turn, this has led to a growing propensity for cosmetic surgery. As aging is associated with loss of collagen fibers, which leads to wrinkles, dryness, pigment changes, and sagging of the skin, geriatric population is a key factor to expand the facial skin ablation treatment market.
