High-barrier medical packaging films are functional films or laminated rollstock used for pharmaceutical, medical-device, diagnostic, infusion, single-use bioprocessing and ostomy-care packaging. They are designed to protect sensitive products from oxygen, moisture, odor, volatile substances, light and external contamination while maintaining product safety, sterility and shelf-life stability during sterilization, transportation and storage. Key upstream materials include PVC, PVdC, PCTFE, EVOH, PE, PP, PA, PET, COC/COP, aluminum foil, AlOx/SiOx coatings, adhesives, heat-seal layers, inks and medical-grade additives. Major downstream uses include pharmaceutical blister packs, sterile medical-device packaging, diagnostic reagent packaging, non-PVC infusion bags, dialysis bags, bioreactor bags, storage bags, mixing bags and ostomy functional films. Compared with ordinary medical packaging films, this category emphasizes high-barrier performance, cleanroom manufacturing, sterilization compatibility, seal integrity, low migration and regulatory validation.
