## Abstracts

The global High Concentration Emulsified Degreaser market size is predicted to grow from US\$ 492 million in 2025 to US\$ 624 million in 2032; it is expected to grow at a CAGR of 3.5% from 2026 to 2032.

In 2025, global production of high-concentration emulsified degreasing agents reached 251,600 tons, with an average selling price of US\$2,000 per ton. The global annual production capacity of high-concentration emulsified degreasing agents is approximately 400,000 tons, with a gross profit margin of approximately 22.7%. High-concentration emulsified degreasing agents are chemical cleaning agents used to clean and remove grease, paint, and other oily dirt. They have a high concentration ratio, effectively emulsifying grease into fine suspended particles, facilitating rinsing and removal. They are widely used in machinery, industrial equipment, automotive repair, kitchen cleaning, and other fields. The upstream of the high-concentration emulsified degreasing agent industry chain includes surfactants, emulsifiers, and corrosion inhibitors; the midstream consists of high-concentration emulsified degreasing agent manufacturers; and the downstream mainly comprises the automotive, machinery, and electronics industries.

The high-concentration emulsified degreasing agent market is in a phase of steady expansion. Key drivers include increased demand from the automotive, machining, petrochemical, painting, and cleaning industries for highly efficient oil removal and environmentally friendly cleaning agents, as well as a growing preference for more efficient, low-VOC, and low-corrosive products. Industry trends focus on high-efficiency emulsification capabilities, broad-spectrum detergency, rapid water rinsing, low moisture and low residue properties, and technological optimizations for water-based systems, renewable raw materials, and recycling. Global manufacturers are enhancing their

competitiveness through formulation innovation, application-specific customization, compliance certification, and regionalized production, resulting in a more specialized and vertically integrated market.
