An HD TV is an example of a next-generation television display technology that is characterized by high resolution and better image quality. This market is estimated to exhibit stagnant growth during the forecast period and is driven by the increase in shipments of LCD/LED TVs. The recent change in the manufacturers' preference

towards the production of high technology-enabled LCD and LED TVs is expected to result in this market's slow but modest CAGR of nearly 2% by 2019.
