The global High Density MTP Optical Cable market size is predicted to grow from US\$ 117 million in 2025 to US\$ 147 million in 2032; it is expected to grow at a CAGR of 3.4% from 2026 to 2032.

In 2024, global production of high-density MTP optical cable reached 12,690 kilometers, with an average selling price of US\$8,050 per kilometer. The annual production capacity of a single high-density MTP optical cable line is approximately 2,000 kilometers, with a gross profit margin of approximately 25.2%. High-density MTP optical cable is a type of fiber optic cable used in data centers, network communications, and fiber optic connection solutions. MTP (Multi-Fiber Termination Push-On) is a specific type of multi-fiber connector developed by US Conec and is commonly used in high-density fiber optic applications. Upstream raw materials for high-density MTP optical cable include optical fiber materials and core wires, cable structural materials, fiber optic connectors and fittings, etc. The midstream consists of high-density MTP optical cable manufacturers, while the downstream primarily serves industries such as local area networks (LANs) and wide area networks (WANs).

With the upgrade of data centers to 400G/800G and the rapid development of 5G base stations, cloud computing, artificial intelligence, and other fields, the demand for high-density fiber optic connections continues to rise. MTP optical cables, with their high density and low loss characteristics, have become the preferred solution for server interconnection within data centers, inter-rack cabling, and 5G fronthaul and backhaul networks. For example, leading cloud computing companies are significantly increasing their fiber optic cable procurement in newly built computing centers compared to traditional data centers, with most of it being customized high-density MTP optical cables. To meet the demands of data centers evolving towards higher speeds, MTP

optical cables are developing towards higher densities (such as 144 cores and above) and lower insertion loss.
