A gyroscope is a device used for measuring or maintaining orientation and angular velocity. It is a spinning wheel or disc in which the axis of rotation (spin axis) is free to assume any orientation by itself. When rotating, the orientation of this axis is unaffected by tilting or rotation of the mounting, according to the conservation of angular momentum.

For the High-End Gyroscopes industry, the market is concentrated. Honeywell, Northrop Grumman, Safran are the leader companies globally. The top 5 manufacturers nearly have market share of 67% in 2019.

North America occupied the largest sales market share with 51% in 2019. It is followed by Europe and Asia-Pacific.

On the basis of product type, RLG segment is projected to account for the largest consumption volume market share during the forecast period; this segment was estimated to account for 45% share in 2019 in terms of consumption volume.

In the applications, Air Plan segment was estimated to account for the highest market share of 43% in 2019, Ship & Submarine segment held 19% of the market share.
