According to our LPI (LP Information) latest study, the global High-Performance Electric Vehicle market size was valued at US\$ 1178 million in 2023. With growing demand in downstream market, the High-Performance Electric Vehicle is forecast to a readjusted size of US\$ 1621.2 million by 2030 with a CAGR of 4.7% during review period.

The research report highlights the growth potential of the global High-Performance Electric Vehicle market. High-Performance Electric Vehicle are expected to show stable growth in the future market. However, product differentiation, reducing costs, and supply chain optimization remain crucial for the widespread adoption of High-Performance Electric Vehicle. Market players need to invest in research and development, forge strategic partnerships, and align their offerings with evolving consumer preferences to capitalize on the immense opportunities presented by the High-Performance Electric Vehicle market.

Electric high-performance vehicles can be differentiated from other EVs on aspects, including longer range of distance i.e., over 150 miles in a single charge, high acceleration, and their ability to attain a speed of over 90 miles per hour with faster acceleration of 0 to 60 miles per hour, unlike that of EV, which can range at speeds varying from 40-65 miles per hour. While purely electric cars do have some limitations, usually including lower range and higher weight, unlike normal gasoline powered cars, they do hold the advantage of having all of their torque available from a standstill.

Global EV sales continued strong. A total of 10,5 million new BEVs and PHEVs were delivered during 2022, an increase of +55 % compared to 2021. China and Europe

emerged as the main drivers of strong growth in global EV sales. In 2022, the production and sales of new energy vehicles in China reach 7.0 million and 6.8 million respectively, a year-on-year increase of 96.9% and 93.4%, with a market share of 25.6%. The production and sales of new energy vehicles have ranked first in the world for eight consecutive years. Among them, the sales volume of pure electric vehicles was 5.365 million, a year-on-year increase of 81.6%. In 2022, sales of pure electric vehicles in Europe will increase by 29% year-on-year to 1.58 million.
