High Pressure Processing (HPP) juice is a type of cold-pressed juice that undergoes a non-thermal pasteurization technique to eliminate harmful bacteria while preserving the nutritional and sensory qualities of the juice. This method involves subjecting the juice to extremely high pressures, which inactivates pathogens without the need for heat, thus retaining the juice's fresh taste, color, and essential nutrients. HPP juice is highly regarded for its longer shelf life compared to traditional fresh juices and its ability to maintain a higher level of vitamins, enzymes, and antioxidants, making it a popular choice for health-conscious consumers? (Pomuna Co)? .
