The global High Purity Carbon Disulphide market size is predicted to grow from US\$ 880 million in 2025 to US\$ 1259 million in 2032; it is expected to grow at a CAGR of 5.2% from 2026 to 2032.

In 2025, global High-Purity Carbon Disulfide production reached approximately 90,000 tons, average price \$10000 / tons, gross margin 25%

High-Purity Carbon Disulfide (CS₂) refers to an ultra-refined, colorless, and highly volatile liquid chemical that has undergone multi-stage precision fractional distillation, chemical scavenging, and ultrafiltration to achieve a purity profile typically ranging from 99.9% to 99.999% (Chromatographic Grade or higher). While crude technical-grade carbon disulfide exhibits a notorious, repulsive odor due to trace amounts of elemental sulfur, hydrogen sulfide, and organic sulfides, the high-purity variant possesses a mild, sweetish odor reminiscent of chloroform, with its free sulfur, heavy metal, and moisture residues restricted to trace ppm or ppb thresholds. Functioning as an exceptionally potent non-polar solvent and high-reactivity chemical intermediate, high-purity CS₂ is indispensable to modern advanced manufacturing; its critical applications include specialized cleaning and etching formulations in semiconductor and microelectronics fabrication, the synthesis of low-refractive-index coatings for precision optical lenses, advanced pharmaceutical synthesis for complex molecular intermediates, and as a premium mobile phase/matrix solvent in High-Performance Liquid Chromatography (HPLC) and infrared spectroscopy. Given its extreme volatility, exceptionally low flash point (-30°C), and wide flammability limits, high-purity grades mandate rigorous packaging and containment protocols, typically stored under an inert gas (such as high-purity nitrogen) blanket within temperature-controlled systems.

United States market for High Purity Carbon Disulphide is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.

China market for High Purity Carbon Disulphide is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.

Europe market for High Purity Carbon Disulphide is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.
