High-purity PVDF pipe is made of polyvinylidene fluoride as raw material. It is a pipe product with extremely high chemical purity and stability through special processes. It has excellent corrosion resistance, high mechanical strength, low permeability and super anti-aging performance. It also meets medical-grade certifications such as USP Class VI and is suitable for ultra-pure fluid transportation in high-cleanliness industrial fields such as semiconductors, photovoltaics, lithium batteries, and medicine. Its smooth surface and non-precipitation characteristics can effectively avoid pollution, and it has a wide operating temperature range. Some models can also resist ultraviolet radiation. It is an ideal choice to replace traditional pipes such as stainless steel and PTFE under harsh working conditions.
