High resolution pixel detector (HRPD) is a kind of radiation detector for various applications, such as particle physics, medical imaging and security scanning. It is designed to detect and measure ionization. HRPD is typically composed of semiconductor materials, such as silicon or cadmium telluride, which are divided into two-dimensional arrays of small pixels. Each pixel is connected to a readout circuit that can detect and measure the charges generated by the interaction between ionizing radiation and semiconductor materials. Overall, HRPD is a powerful tool for detecting and measuring ionizing radiation, with high spatial and energy resolution, and has wide applications in various fields.
