A high refresh rate OLED display is a screen that uses organic light-emitting diode (OLED) technology and features a higher refresh rate (typically 120Hz, 144Hz, or higher), offering smoother and clearer image display. OLED technology allows each pixel to emit its own light, eliminating the need for a backlight and providing deeper blacks and higher contrast. The high refresh rate enhances the display of fast-moving visuals, making it particularly ideal for gaming, movies, and high-performance computing applications, delivering a more detailed and immersive visual experience.
