The high-speed magnetic levitation centrifugal fan is a centrifugal fan that uses magnetic levitation technology to achieve non-contact bearings. This type of fan uses a magnetic levitation bearing system to support and stabilize the fan rotor through the force generated by the electromagnetic field, so that it does not rub against traditional mechanical bearings when rotating at high speed, thus reducing mechanical loss and noise, and improving operating efficiency and reliability. sex. High-speed magnetic levitation centrifugal fans are usually used in air conditioning, ventilation, air purification and other fields that require high efficiency and low noise.
