High-speed steel single-angle milling cutter is a specific industrial milling cutter, mainly made of high-speed steel. High-speed steel is an alloy steel with high hardness, high wear resistance and high heat resistance, which is particularly suitable for manufacturing cutting tools. High-performance high-speed steel milling cutters often use M42 material, which has a high cobalt content (8%). The addition of cobalt can increase the hardness of the matrix and thus improve wear resistance. The notable feature of a single angle milling cutter is that its teeth are at a single angle, with common angles including 45 degrees, 60 degrees and 90 degrees. This design allows it to mainly process various angles and is suitable for milling angle grooves.

The global High Speed Steel Single Angle Milling Cutter market size is projected to grow from US\$ 3034 million in 2024 to US\$ 4233 million in 2030; it is expected to grow at a CAGR of 5.7% from 2024 to 2030.
