High-tech sun protection clothing is clothing specifically designed for sun protection and is produced from a fabric rated for its level of ultraviolet (UV) protection.

Rising prevalence of skin cancer and other skin-related diseases has led to growing demand for protective clothing. Sales of sun protection clothing are expected to increase owing to rising income levels and changing personal lifestyles. On-trend clothing now incorporates sun protection, giving manufacturers an opportunity to offer a variety of UPF clothing options to appeal to fashion consumers. This trend allows manufacturers to satisfy customers' style preferences while ensuring they are protected from the sun's harmful rays. The increasing popularity of outdoor recreation and travel is driving the demand for UPF sun protection clothing.
