The global High-Temp Release Agent market size is predicted to grow from US\$ 727 million in 2025 to US\$ 1008 million in 2031; it is expected to grow at a CAGR of 5.6% from 2025 to 2031.

High-Temp Release Agents offers efficient and effective release solutions for molding operations which operate at temperatures exceeding 1562°F / 842°C, such as lights metals or glass molding.

Release agents, also known as mold release agents or demolding agents, play a crucial role in various industries, including manufacturing, food processing, and automotive, by preventing adhesion between surfaces and molds or tools. The food processing industry is a significant consumer of release agents, especially for baking and confectionery applications. The demand for healthier and cleaner-label food products has driven the need for specialized food-grade release agents. The manufacturing industry, including the automotive, aerospace, and foundry sectors, relies on release agents to facilitate the demolding of components. The adoption of advanced materials and technologies has influenced the demand for specialized release agents.
