The global High Temperature Polyamides market size is predicted to grow from US\$ 2674 million in 2025 to US\$ 4119 million in 2031; it is expected to grow at a CAGR of 7.5% from 2025 to 2031.

Polyamides are probably the most successful polymers in the field of highly technical applications. In the past few decades, we have witnessed the introduction of nylon as a replacement for metals and thermosetting materials in many applications in all industrial sectors. As is well known, nylon is a primary choice for applications at high temperatures, due to its excellent thermal resistance. In general, high temperature polyamides should have a heat resistance temperature of more than 200 degrees Celsius.

China is the largest market with about 28% market share. Europe is follower, accounting for about 25% market share.

The key players are DowDuPont, DSM, EMS-GRIVORY, Solvay, Mitsui Chemicals, Kuraray, BASF, Evonik, Genius, Kingfa etc. Top 3 companies occupied about 62% market share.
