## Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

High-Visibility clothing is defined as clothing with the purpose of making the wearer more visible. It falls in the category of Personal Protective Equipment (PPE) and will have an ANSI/ISEA label defining garment characteristics including manufacturer info as well as product designation and the corresponding ANSI/ISEA class standard. High-Visibility clothing increases conspicuity of workers that may be exposed to hazardous situations under both day and evening low-light conditions. Very bright colors are used in apparel designed to provide maximum conspicuity during daylight hours. The reflective material is added to apparel for workers in traffic and where other light sources reflect.
