The global High Voltage DC Contactor Relays market size is predicted to grow from US$ million in 2025 to US$ million in 2031; it is expected to grow at a CAGR of %from 2025 to 2031.

High voltage DC contactor relays are the core components of new energy vehicles, mainly switches that control the on/off of high voltage circuits with low voltage, enabling new energy vehicles to meet international safety regulations. In the automated control circuit, it is actually an automatic switch that uses a low current to control the operation of a high current and forms a safety protection mechanism and changeover circuit with other components in the circuit. Since relays have been upgraded to high-voltage relays and contactors have been miniaturised, it is difficult to distinguish between relays and contactors.

United States market for High Voltage DC Contactor Relays is estimated to increase from US$ million in 2024 to US$ million by 2031, at a CAGR of % from 2025 through 2031.
