According to our LPI (LP Information) latest study, the global Hiking Sandals market size was valued at US\$ million in 2023. With growing demand in downstream market, the Hiking Sandals is forecast to a readjusted size of US\$ million by 2030 with a CAGR of % during review period.

The research report highlights the growth potential of the global Hiking Sandals market. Hiking Sandals are expected to show stable growth in the future market. However, product differentiation, reducing costs, and supply chain optimization remain crucial for the widespread adoption of Hiking Sandals. Market players need to invest in research and development, forge strategic partnerships, and align their offerings with evolving consumer preferences to capitalize on the immense opportunities presented by the Hiking Sandals market.

Hiking sandals are designed specifically for use on the trail. They include arch support, rugged lugged soles, and durable straps to keep your feet firmly in place. Some varieties include toe protection as well. They are all designed to get wet. Hiking sandals are the lightest and most breathable hiking footwear option available.

In 2022, the gradual relaxation of epidemic prevention and control measures around the world will have a positive impact on the rapid recovery of the tourism industry. According to data from the World Tourism Organization, the number of global travelers exceeded 900 million in 2022, a two-fold increase compared to 2021. In 2022, international tourism revenue returned to the US\$ 1 trillion, a real increase of 50% compared with 2021. According to data from the Ministry of Culture and Tourism of China, in 2022, the total number of domestic tourists was ? 2.53 billion, and the domestic tourism revenue (total tourism consumption) was ? 2 trillion.
