Abstracts

The global Home BBQ Grills market size is predicted to grow from US\$ 1152 million in 2025 to US\$ 1627 million in 2032; it is expected to grow at a CAGR of 5.5% from 2026 to 2032.

In 2025, global sales volume of home BBQ grills is estimated at approximately 6,200,000 units, with an average selling price of around USD 190 per unit. Home BBQ grills are cooking devices designed for residential use, typically used in backyards, balconies, and family gatherings to grill meat, seafood, and vegetables. These products can be powered by various heat sources, including charcoal, gas, and electricity. They emphasize ease of use, safety, and size suitability for home environments, supporting both everyday light usage and higher-frequency use during holidays or gatherings. The structure typically includes heating systems, cooking grates, temperature control components, and housing structures, with variations in size, functionality, and fuel type.

From a market structure perspective, home BBQ grills represent a core consumer segment within the broader grill market, with demand closely linked to outdoor lifestyles, backyard culture, and disposable income levels. Within the overall grill ecosystem, this category has broad coverage and stable demand, serving as one of the key drivers of market growth. Industry barriers are relatively low, with competition focused on branding, product design, distribution channels, and user experience. The market exhibits a structure characterized by concentration among leading brands and fragmentation in the lower-end segments.
