The global Home Convection Air Fryer Toaster Ovens market size is predicted to grow from US\$ 1346 million in 2025 to US\$ 1823 million in 2031; it is expected to grow at a CAGR of 5.2% from 2025 to 2031.

The market for home convection air fryer toaster ovens is expected to grow in the coming years due to the increasing demand for healthier cooking options and the convenience of having multiple cooking functions in one appliance. These appliances use convection technology to circulate hot air around the food, resulting in crispy and evenly cooked meals without the need for excessive oil or fat. The rise in health consciousness among consumers has led to a shift towards healthier cooking methods, and air fryer toaster ovens provide a healthier alternative to traditional deep frying. Additionally, the convenience of having multiple cooking functions in one appliance, such as baking, broiling, and toasting, makes these appliances an attractive option for busy households.
