Home and Office Lenses, also referred to as occupational lenses and computer lenses, offer two different fields of vision in the same lens. They are generally used for work and reading purposes in a home or office setting. This means that you can focus on both a mid-range distance (like reading from a computer) and a near-range distance (like reading a book) with the same pair of glasses. Office lenses are suitable for a distance of up to five feet, which is why they are great for office or home settings.

The global Home and Office Lenses market size is projected to grow from US\$ million in 2023 to US\$ million in 2030; it is expected to grow at a CAGR of % from 2024 to 2030.
