With growing demand in downstream market, the Home Standby Generators is forecast to a readjusted size of US\$ 2236.6 million by 2030 with a CAGR of 3.5% during review period.

The research report highlights the growth potential of the global Home Standby Generators market. Home Standby Generators are expected to show stable growth in the future market. However, product differentiation, reducing costs, and supply chain optimization remain crucial for the widespread adoption of Home Standby Generators. Market players need to invest in research and development, forge strategic partnerships, and align their offerings with evolving consumer preferences to capitalize on the immense opportunities presented by the Home Standby Generators market.

Growing intensity and frequency of prolonged power disruptions on account of grid inadequacy, deteriorating weather conditions heighten consumer awareness of power reliability concerns. Home Standby Generator delivers power directly to home's electrical system, backing up entire home or just the most essential items when the municipal power is out. New energy such as wind power in the United States accounts for a large proportion of power supply (more than 70%), but in severe weather conditions, the energy supply is unstable, and the power storage in the United States has not reached the level of South Korea, resulting in power outages due to tight power supply. North America is the largest consumer region in the world due to consumption habits. As for gas generators, a major advantage is that they do not require a fuel tank, so natural gas generator sets take up less space and can be more easily installed in

tight spots, such as on the roof of a building, so it occupies a large market share.

Global key players of home standby generator include Generac Holdings Inc., Briggs & Stratton Corporation, Kohler Co., Cummins Inc., etc. Global top three manufacturers hold a share over 77%. North America is the largest producer of home standby generator holds a share over 90%. In terms of product, natural gas is the largest segment, with a share over 87%.
