The report requires updating with new data and is sent in 48 hours after order is placed.

Gains in home organization products will stem from greater product availability and ongoing consumer interest in utilizing home organization products to organize and store belongings. Continued growth in consumer spending and an improving housing market, coupled with expansion in the number of households, will also propel sales. Demographic trends such as the large baby boomer cohort downsizing as they become empty nesters and their children moving into college housing and first apartments will also provide opportunities since small spaces benefit greatly from organization products.
