The global Home Traction Chair market size is predicted to grow from US\$ 735 million in 2025 to US\$ 1012 million in 2032; it is expected to grow at a CAGR of 4.8% from 2026 to 2032.

In 2024, the global home traction chair market unit price is US\$1,100 per piece, with sales volume of approximately 650,000 units. A Home Traction Chair, often referred to in the context of spinal traction, is a device designed to apply a distraction force to the cervical (neck) and lumbar (back) spine to separate the spinal bones and relieve pressure on sensitive structures responsible for pain. It is used to treat conditions like herniated discs, degenerative disc disease, and scoliosis by decompressing the spine, which may alleviate pain and facilitate healing.

The home traction chair market is experiencing steady growth, primarily driven by the global aging population and rising demand for home rehabilitation. As people become more health-conscious, these products, which combine therapeutic and healthcare functions, are gradually expanding from medical institutions to the home, becoming a key option for daily health management for the elderly.

Product technology continues to evolve towards intelligence and convenience. Newer generations of traction chairs are integrating electronic control systems and ergonomic design, providing more precise traction adjustment and a more comfortable user experience. Some high-end products also incorporate IoT technology, enabling remote monitoring and professional guidance, significantly improving the safety and effectiveness of home rehabilitation.

Regional markets are showing differentiated development characteristics. European and American countries, with their well-developed healthcare systems and higher spending power, have strong demand for high-end intelligent products. The Asian

market, however, prioritizes cost-effectiveness and adaptability, driving manufacturers to develop product forms more suitable for compact living environments. With the upgrading of health consumption, this market still has broad room for growth.
