## Abstracts

The global Home Walking Aid market size is predicted to grow from US\$ 3543 million in 2025 to US\$ 5774 million in 2032; it is expected to grow at a CAGR of 7.4% from 2026 to 2032.

A home walking aid is a device designed to assist individuals with mobility challenges in walking and maintaining balance within their home environment. These aids provide support, stability, and improved safety, enabling individuals to move independently and with confidence.

The rising geriatric population coupled with the increasing prevalence of arthritis and Parkinson's is estimated to drive the market growth. In addition, a favorable reimbursement framework and regulatory policies are also anticipated to fuel the market's growth. However, the mobility devices industry witnessed a significant setback due to the COVID-19 pandemic.
