Horizontal Fan Coil Units are often referred to simply as a "horizontal FCU," is an HVAC (Heating, Ventilation, and Air Conditioning) device used for space conditioning in buildings.

Horizontal Fan Coil Units can be designed for both heating and cooling applications. In cooling mode, they use a refrigerant coil to remove heat from the air, while in heating mode, they use a heating coil to add warmth to the air. Horizontal FCUs are typically controlled by a thermostat or a building automation system. This allows users to set and maintain the desired temperature within the space. Horizontal fan coil units are commonly used in hotels, apartments, office buildings, hospitals, and other commercial or residential spaces. They are versatile and can be installed in various concealed locations to maintain aesthetics.
