The global Horizontal Sewage Pumps market size is predicted to grow from US\$ 2317 million in 2025 to US\$ 3236 million in 2032; it is expected to grow at a CAGR of 5.0% from 2026 to 2032.

Horizontal Sewage Pump is a pumping device for discharging sewage and wastewater and is a single-stage, single-suction, cantilevered centrifugal sewage pump. It mainly consists of pump cover, pump casing, impeller, shaft seal, shaft, bracket and other components. The shaft seal adopts a new double-sided mechanical seal structure, and the pump and motor are mounted on a common chassis, which is directly driven by the motor through an elastic coupling. It is typically installed in a wastewater treatment facility or sewage well and is used to pump wastewater from a low point to a high point for entry into the wastewater treatment system or discharge to a wastewater treatment plant. Horizontal sewage pumps typically have a large capacity and corrosion resistance and are suitable for a variety of sewage treatment environments. In 2024, global Horizontal Sewage Pumps production reached approximately 451 k units, with an average global market price of around 5000 US\$/Unit. The production capacity of Horizontal Sewage Pumps reaches 560 k units, and the industry's gross profit margin is approximately between 20% and 40%.

Driving factors in the horizontal sewage pumps market include rapid urbanization and expansion of municipal wastewater networks, which require reliable pumps for lift stations, sewage treatment plants and drainage systems as cities grow and densify. Stricter environmental and discharge regulations are pushing utilities and industrial users to upgrade older, failure-prone equipment in order to reduce overflow events, untreated discharge and maintenance-related downtime. At the same time, the rise of large commercial complexes, industrial parks and decentralized treatment facilities is

driving demand for compact, easy-to-maintain horizontal pump configurations that fit into constrained plant rooms and underground stations.
