The global Hot Melt Adhesive for Textile Fabric market size is predicted to grow from US\$ million in 2025 to US\$ million in 2031; it is expected to grow at a CAGR of % from 2025 to 2031.

Hot melt adhesive for textile fabric is a type of adhesive specifically designed for bonding textile materials. It is a thermoplastic adhesive that is applied in a molten state and solidifies upon cooling to form a strong bond between textile fabrics.

Hot melt adhesives for textile fabric offer several benefits and features:

**Strong bonding:** These adhesives provide excellent adhesion and bonding strength to various types of textile fabrics, including cotton, polyester, nylon, silk, and more. They form a durable and long-lasting bond between fabric layers.

**Fast and efficient application:** Hot melt adhesives have a quick setting time, allowing for efficient production processes. They can be applied using various methods such as spraying, roller coating, or extrusion, enabling high-speed bonding in textile manufacturing.

**Versatility:** Hot melt adhesives can be used for a wide range of textile applications, including fabric lamination, hemming, seaming, applique, embroidery backing, and fabric repairs. They can bond different types of fabrics, including lightweight and heavy-duty textiles.

**Flexibility and softness:** Hot melt adhesives for textile fabric are formulated to maintain the flexibility and softness of the bonded fabrics. They do not stiffen or alter the texture

of the fabric, ensuring comfort and flexibility in the final textile product.

**Washability and durability:** These adhesives exhibit good resistance to washing and dry cleaning, allowing the bonded textile fabrics to maintain their integrity and strength even after multiple washes.

Hot melt adhesives for textile fabric are widely used in the textile and apparel industry, including garment manufacturing, upholstery, footwear, and home furnishings. They provide efficient and reliable bonding solutions, eliminating the need for sewing or traditional adhesive methods and enhancing the production efficiency and quality of textile products.
