Hot water extraction carpet cleaner utilizes a combination of high-temperature hot water and powerful extraction technology to provide deep cleaning solutions for carpets. This cleaning machine generates high-temperature hot water through a heating system, effectively softening and breaking down stubborn stains and grease in carpet fibers. Simultaneously, a high-pressure spray nozzle evenly distributes the hot water onto the carpet, penetrating deep into the fibers for cleaning. Subsequently, a powerful suction system rapidly recovers the hot water containing stains, ensuring the carpet surface is clean and dry. Hot water extraction cleaning not only thoroughly removes dirt from carpets but also effectively kills bacteria, mites, and other microorganisms, providing additional hygienic protection for indoor environments. Suitable for various carpet materials and styles, it is an ideal choice for maintaining carpet hygiene and aesthetics.
