The report requires updating with new data and is sent in 48 hours after order is placed.

The global Hotel Kiosk market size is predicted to grow from US$ 9956 million in 2025 to US$ 20240 million in 2031; it is expected to grow at a CAGR of 12.6% from 2025 to 2031.

Rising number of ATMs and self-service terminals in Asia Pacific is expected to drive the market. The Asia-Pacific region, including China, India, Japan, and other Asia-Pacific countries, has seen a significant increase in the deployment of ATMs and self-service kiosks in recent years. Several factors have contributed to this trend. First, rapid urbanization and population growth in many Asian countries has increased the need for self-service options and convenient services.

ATMs have become an essential part of banking infrastructure, providing 24/7 financial services to individuals and businesses. The number of ATMs continues to increase as financial inclusion initiatives and digital banking services expand across Asia Pacific.

According to NPCI, the number of ATMs under the National Financial Switching (NFS) network has surpassed 255,000 by January 2022. NFS is India's largest ATM network with nearly 1,200 affiliated members and over 300 million transactions.

Additionally, various industries including retail, transportation, healthcare, and hospitality are increasingly adopting self-service kiosks to enhance customer experience, streamline operations, and increase efficiency. Benefits offered by kiosks include reducing wait times, enabling self-checkout, providing information and directions, and simplifying the ticketing and booking process.

Additionally, technological advancements and innovations in kiosk hardware and

software have made them more versatile and user-friendly. The integration of touchscreens, biometric authentication, voice recognition, and mobile connectivity enhances the functionality and convenience of kiosks, further driving their adoption.
