Abstracts

The global Household Countertop and Built-in Induction Cooktops market size is predicted to grow from US\$ 3135 million in 2025 to US\$ 4556 million in 2032; it is expected to grow at a CAGR of 5.6% from 2026 to 2032.

Household Countertop and Built-in Induction Cooktops are residential electric cooking appliances that generate a high-frequency electromagnetic field through an induction coil beneath a heat-resistant glass-ceramic or comparable cooking surface, producing eddy currents directly in compatible ferromagnetic cookware. The research scope covers portable countertop models, fixed built-in hobs and household countertop-and-built-in dual-use products. Countertop products are generally configured with one or two heating modules and emphasize portability, rapid heating, compact dimensions and compatibility with household electrical outlets. Built-in products typically provide multiple heating zones, higher connected power, integrated kitchen installation and more advanced functions such as bridge zones, flexible cooking areas, automatic cookware detection, temperature sensing, power sharing, booster heating, child locks, residual-heat indication and connected control. Key product parameters include installation type, number and configuration of heating modules, rated power, cooking-zone dimensions, thermal-control accuracy, energy efficiency, surface material, safety protection, user interface and connectivity. The research focuses on products commercialized for food preparation in private homes, apartments and other residential kitchen environments.

Key Findings

Asia-Pacific represents the largest unit-demand base for Household Countertop and Built-in Induction Cooktops

Countertop induction cooktops lead unit sales while built-in products generate higher average value

Single-zone models remain the core countertop format and multi-zone hobs dominate built-in demand

Flexible zones temperature sensing and integrated ventilation are reshaping premium product development

Competition combines global appliance groups with strong regional countertop specialists

Market Trends

The Household Countertop and Built-in Induction Cooktops market is shifting from basic electromagnetic heating toward integrated cooking-control systems. In the countertop segment, development priorities include slimmer structures, lower-noise cooling, stable performance under voltage fluctuations, preset cooking programs, more accurate low-power control and improved portability. Built-in products are moving toward bridge zones, flexible or full-surface cooking, automatic pan-position recognition, sensor-assisted frying and boiling control, high-resolution touch interfaces and remote monitoring. Premium kitchens are also adopting induction hobs combined with downdraft ventilation, reducing the need for conventional overhead hoods. Product differentiation is increasingly determined by control algorithms, thermal management, electromagnetic compatibility, interface design and ecosystem integration rather than rated power alone. Power-electronics development is progressing from conventional IGBT architectures toward higher-efficiency devices and, over the longer term, silicon-carbide and gallium-nitride solutions capable of supporting higher switching frequencies, increased power density and more compact appliance structures.

Market Dynamics

Drivers

Market demand is supported by the combination of rapid heating, precise power response, easy-to-clean surfaces and reduced exposure to open flames. Direct heating of cookware limits unnecessary heat transfer to the surrounding kitchen, supporting energy efficiency and user comfort. Urbanization, smaller household sizes, modular kitchen development and the expansion of online appliance retail are strengthening

demand for compact countertop models, particularly among renters and first-time appliance buyers. Built-in demand is influenced by residential renovation, kitchen replacement cycles and the gradual electrification of household cooking. Energy-efficiency programs and residential appliance incentives in selected markets further improve consumer awareness and reduce the effective cost of switching from conventional cooking technologies.

Restraints

The principal constraints differ between countertop and built-in products. Countertop models face intense price competition, limited space for hardware differentiation and consumer sensitivity to fan noise, low-power temperature fluctuation and product durability. Built-in induction cooktops require higher initial expenditure and may involve dedicated electrical circuits, countertop modification and professional installation. Some households must also replace incompatible cookware, increasing the total conversion cost. Complex power boards, touch-control systems, sensors and cooling assemblies can raise repair costs, while damage to the glass-ceramic surface may require replacement of a major assembly. Demand can therefore be constrained in markets with weak residential electrical infrastructure, low renovation expenditure or strong consumer attachment to gas cooking.

Opportunities

Substantial opportunities remain in households that have not yet adopted induction cooking. Affordable single-zone and dual-zone countertop products provide a low-cost route into rental housing, small apartments and regions where complete kitchen renovation is impractical. In developed markets, replacement demand creates opportunities for flexible-zone hobs, products with integrated ventilation and models designed to fit existing countertop cut-outs. Further gains may come from improved automatic temperature control, greater compatibility with different cookware materials, quieter thermal management and connected cooking assistance. Advances in wide-bandgap semiconductors, power modules and control software may enable thinner designs, reduced energy loss and improved high-power stability. Regional customization—including cooking presets, power ratings, plug configurations, control languages and cookware-size recognition—will remain important for converting technical innovation into commercial growth.

Challenges

Manufacturers must balance performance improvement with affordability, reliability and

regulatory compliance. Increasing the number of coils, sensors and connected functions raises system complexity and places greater demands on electromagnetic compatibility, cooling design, software validation and long-term component stability. Products must also be adapted to different voltage systems, household circuit capacities, installation dimensions and safety requirements. Countertop suppliers face rapid model turnover, online price transparency and low switching costs for consumers, while built-in suppliers depend heavily on kitchen specialists, installers and after-sales networks. Product recalls or persistent failures involving power boards, touch controls, cooling fans or surface materials can materially affect brand confidence. Demand is also exposed to housing cycles, renovation expenditure and changes in appliance-efficiency or household-electrification policies.

Industry Chain Analysis

The upstream chain for Household Countertop and Built-in Induction Cooktops comprises glass-ceramic surfaces, copper induction coils, magnetic components, IGBTs or MOSFETs, gate drivers, microcontrollers, resonant capacitors, printed circuit boards, temperature and current sensors, touch-control modules, cooling fans, power cables and structural metal or polymer parts. Glass-ceramic quality affects thermal resistance, appearance, light transmission and long-term surface durability, while the semiconductor, coil and resonant-circuit combination determines conversion efficiency, controllability and reliability. Induction systems commonly use resonant switching architectures in which power devices regulate high-frequency current through the induction coil.

Midstream activities cover industrial design, power-electronics engineering, electromagnetic and thermal simulation, firmware development, component sourcing, coil and control-board assembly, final appliance integration, safety testing and energy-performance verification. Downstream channels include brand-owned stores, appliance chains, e-commerce platforms, supermarkets, kitchen studios, home-improvement retailers, residential developers and installation partners. Cost competition is particularly strong in standard countertop products, where scale purchasing, automated assembly and online distribution are decisive. Built-in products generally create more value through product architecture, surface design, cooking-zone flexibility, installation compatibility, software functions, brand reputation and service coverage. As a result, value capture is typically higher in premium built-in systems than in highly standardized entry-level countertop models.

Segment Insights

Countertop induction cooktops represent the larger segment by unit volume. Single-zone models form the core of this category because of their low acquisition cost, small footprint, ease of transport and suitability for everyday boiling, frying, hot-pot cooking and supplementary kitchen use. Standard-power products occupy the broadest demand range, while lower-power models serve space-constrained or electricity-constrained households. Dual-zone countertop products form a smaller but expanding segment by offering a transition between portable appliances and complete built-in installations. Online marketplaces are especially important to countertop sales because product specifications, price and customer reviews can be compared easily.

Built-in induction cooktops account for a higher proportion of market value due to multi-zone configurations, higher power ratings, more complex electronics and professional installation requirements. Conventional fixed cooking zones remain the volume foundation, but bridge-zone, flexible-zone and full-surface systems are gaining importance in the premium segment. Growth opportunities are also emerging in models with integrated ventilation, automatic heat regulation and connected functions. The built-in segment is more dependent on kitchen renovation, new residential construction, dealer recommendations and after-sales service, resulting in higher entry barriers and greater importance of brand credibility than in the countertop segment.

Downstream Market Opportunities

The principal downstream opportunity is the continued conversion of household cooking from gas and conventional electric heating toward induction-based systems. Countertop products address first-time buyers, renters, students, smaller households, secondary kitchens and consumers seeking an additional heating module without structural renovation. Built-in products serve homeowners renovating kitchens, purchasers of newly constructed housing and consumers replacing aging electric or gas hobs. Safety-oriented households, including families with children and elderly users, represent an important demand group because induction products eliminate open flames and offer pan detection, automatic shut-off and residual-heat functions. Further opportunity exists in coordinating cooktops with ventilation, ovens, mobile applications and broader smart-kitchen systems, although commercial success will depend on functions providing clear cooking or maintenance benefits.

Regional Insights

Asia-Pacific forms the largest demand base by unit volume. China combines extensive production capacity, broad brand participation and established demand for both

affordable countertop cookers and increasingly sophisticated built-in products. India remains strongly oriented toward countertop models, supported by price-sensitive households and well-developed small-appliance channels. Japan and South Korea are comparatively mature markets in which embedded kitchen systems, precise temperature control, product reliability and compact design are important. Southeast Asia offers additional countertop growth potential as household electrification, modern retail and e-commerce penetration increase.

Europe is characterized by higher built-in penetration, standardized kitchen installations and stronger demand for multi-zone, flexible-zone and integrated-ventilation products. Ecodesign requirements for domestic hobs reinforce attention to energy performance and product information. North America begins from a smaller induction base than several European and Asian markets but presents replacement opportunities linked to kitchen renovation, residential electrification and efficiency incentives. The Middle East combines demand for portable countertop products with growing interest in premium built-in kitchens, while market development remains uneven due to differences in housing formats, electricity infrastructure, income levels and cooking habits.

Competitive Landscape Analysis

The competitive landscape has a dual structure. Global appliance groups such as Midea, BSH, Electrolux, Haier, Whirlpool, Samsung, Panasonic and LG compete through broad product portfolios, international distribution, power-electronics capability, kitchen-appliance integration and established service networks. Miele and other premium European participants differentiate through flexible cooking surfaces, control precision, design and specialist kitchen channels. Chinese manufacturers including Midea, Supor, Joyoung, Haier, Hisense, Galanz and Xiaomi benefit from manufacturing scale, rapid product iteration, broad countertop portfolios and strong e-commerce execution. Versuni, operating the Philips domestic-appliance portfolio, and TTK Prestige hold important positions in selected countertop markets, while CASO and FUJI INDUSTRIAL maintain differentiated regional positions. Competition in entry-level countertop products is fragmented and price-driven, whereas built-in markets are more concentrated around companies with certification capabilities, installation-channel access and long-term after-sales support. Strategic emphasis is shifting toward regional product localization, platform sharing across appliance brands, connected-kitchen integration and premium functions that can defend margins against hardware commoditization.

Report Scope

LP Information, Inc. (LPI) ' newest research report, the “Household Countertop and Built-in Induction Cooktops Industry Forecast” looks at past sales and reviews total world Household Countertop and Built-in Induction Cooktops sales in 2025, providing a comprehensive analysis by region and market sector of projected Household Countertop and Built-in Induction Cooktops sales for 2026 through 2032. With Household Countertop and Built-in Induction Cooktops sales broken down by region, market sector and sub-sector, this report provides a detailed analysis in US\$ millions of the world Household Countertop and Built-in Induction Cooktops industry.

This Insight Report provides a comprehensive analysis of the global Household Countertop and Built-in Induction Cooktops landscape and highlights key trends related to product segmentation, company formation, revenue, and market share, latest development, and M&A activity. This report also analyzes the strategies of leading global companies with a focus on Household Countertop and Built-in Induction Cooktops portfolios and capabilities, market entry strategies, market positions, and geographic footprints, to better understand these firms' unique position in an accelerating global Household Countertop and Built-in Induction Cooktops market.

This Insight Report evaluates the key market trends, drivers, and affecting factors shaping the global outlook for Household Countertop and Built-in Induction Cooktops and breaks down the forecast by Installation Method, by Sales Channel, geography, and market size to highlight emerging pockets of opportunity. With a transparent methodology based on hundreds of bottom-up qualitative and quantitative market inputs, this study forecast offers a highly nuanced view of the current state and future trajectory in the global Household Countertop and Built-in Induction Cooktops.

This report presents a comprehensive overview, market shares, and growth opportunities of Household Countertop and Built-in Induction Cooktops market by product type, application, key manufacturers and key regions and countries.

Market Segmentation

Segmentation by Installation Method:

Countertop Induction Cooktop

Built-in Induction Cooktop

Segmentation by Power Rating:

<1.5 kW

1.5–2.2 kW

≥2.2 kW

Segmentation by Number of Heating Zones:

Single

Dual

Multiple

Segmentation by Sales Channel:

Online Sales

Offline Sales

This report also splits the market by region:

Americas

United States

Canada

Mexico

Brazil

Europe

Germany

France

UK

Italy

Russia

Middle East & Africa

Egypt

South Africa

Israel

Turkey

GCC Countries

The below companies that are profiled have been selected based on inputs gathered

from primary experts and analysing the company's coverage, product portfolio, its market penetration.

Midea Group Co., Ltd.

BSH Hausger?te GmbH

Electrolux AB

Haier Smart Home Co., Ltd.

Whirlpool Corporation

Samsung Electronics Co., Ltd.

Panasonic Corporation

LG Electronics Inc.

Zhejiang Supor Co., Ltd.

Joyoung Co., Ltd.

Versuni Holding B.V.

Hisense Home Appliances Group Co., Ltd.

Miele & Cie. KG

TTK Prestige Limited

Xiaomi Corporation

Guangdong Galanz Group Co., Ltd.

CASO GmbH

FUJI INDUSTRIAL CO., LTD.

Key Questions Addressed in this Report

What is the 10-year outlook for the global Household Countertop and Built-in Induction Cooktops market?

What factors are driving Household Countertop and Built-in Induction Cooktops market growth, globally and by region?

Which technologies are poised for the fastest growth by market and region?

How do Household Countertop and Built-in Induction Cooktops market opportunities vary by end market size?

How does Household Countertop and Built-in Induction Cooktops break out by Installation Method, by Sales Channel?

Contents

1 SCOPE OF THE REPORT

- 1.1 Market Introduction
- 1.2 Years Considered
- 1.3 Research Objectives
- 1.4 Market Research Methodology
- 1.5 Research Process and Data Source
- 1.6 Economic Indicators
- 1.7 Currency Considered
- 1.8 Market Estimation Caveats

2 EXECUTIVE SUMMARY

2.1 World Market Overview

2.1.1 Global Household Countertop and Built-in Induction Cooktops Annual Sales 2021-2032

2.1.2 World Current & Future Analysis for Household Countertop and Built-in Induction Cooktops by Geographic Region, 2021, 2025 & 2032

2.1.3 World Current & Future Analysis for Household Countertop and Built-in Induction Cooktops by Country/Region, 2021, 2025 & 2032

2.2 Household Countertop and Built-in Induction Cooktops Segment by Installation Method

2.2.1 Countertop Induction Cooktop

2.2.2 Built-in Induction Cooktop

2.2.3 Household Countertop and Built-in Induction Cooktops Sales by Installation Method

2.2.3.1 Global Household Countertop and Built-in Induction Cooktops Sales Market Share by Installation Method (2021-2026)

2.2.3.2 Global Household Countertop and Built-in Induction Cooktops Revenue and Market Share by Installation Method (2021-2026)

2.2.3.3 Global Household Countertop and Built-in Induction Cooktops Sale Price by Installation Method (2021-2026)

2.3 Household Countertop and Built-in Induction Cooktops Segment by Power Rating

2.3.1 <1.5 kW

2.3.2 1.5–2.2 kW

2.3.3 ?2.2 kW

2.3.4 Household Countertop and Built-in Induction Cooktops Sales by Power Rating

2.3.4.1 Global Household Countertop and Built-in Induction Cooktops Sales Market Share by Power Rating (2021-2026)

2.3.4.2 Global Household Countertop and Built-in Induction Cooktops Revenue and Market Share by Power Rating (2021-2026)

2.3.4.3 Global Household Countertop and Built-in Induction Cooktops Sale Price by Power Rating (2021-2026)

2.4 Household Countertop and Built-in Induction Cooktops Segment by Number of Heating Zones

2.4.1 Single

2.4.2 Dual

2.4.3 Multiple

2.4.4 Household Countertop and Built-in Induction Cooktops Sales by Number of Heating Zones

2.4.4.1 Global Household Countertop and Built-in Induction Cooktops Sales Market Share by Number of Heating Zones (2021-2026)

2.4.4.2 Global Household Countertop and Built-in Induction Cooktops Revenue and Market Share by Number of Heating Zones (2021-2026)

2.4.4.3 Global Household Countertop and Built-in Induction Cooktops Sale Price by Number of Heating Zones (2021-2026)

2.5 Household Countertop and Built-in Induction Cooktops Segment by Sales Channel

2.5.1 Online Sales

2.5.2 Offline Sales

2.5.3 Household Countertop and Built-in Induction Cooktops Sales by Sales Channel

2.5.3.1 Global Household Countertop and Built-in Induction Cooktops Sale Market Share by Sales Channel (2021-2026)

2.5.3.2 Global Household Countertop and Built-in Induction Cooktops Revenue and Market Share by Sales Channel (2021-2026)

2.5.3.3 Global Household Countertop and Built-in Induction Cooktops Sale Price by Sales Channel (2021-2026)

3 GLOBAL BY COMPANY

3.1 Global Household Countertop and Built-in Induction Cooktops Breakdown Data by Company

3.1.1 Global Household Countertop and Built-in Induction Cooktops Annual Sales by Company (2021-2026)

3.1.2 Global Household Countertop and Built-in Induction Cooktops Sales Market Share by Company (2021-2026)

3.2 Global Household Countertop and Built-in Induction Cooktops Annual Revenue by

Company (2021-2026)

3.2.1 Global Household Countertop and Built-in Induction Cooktops Revenue by Company (2021-2026)

3.2.2 Global Household Countertop and Built-in Induction Cooktops Revenue Market Share by Company (2021-2026)

3.3 Global Household Countertop and Built-in Induction Cooktops Sale Price by Company

3.4 Key Manufacturers Household Countertop and Built-in Induction Cooktops Producing Area Distribution, Sales Area, Product Type

3.4.1 Key Manufacturers Household Countertop and Built-in Induction Cooktops Product Location Distribution

3.4.2 Players Household Countertop and Built-in Induction Cooktops Products Offered

3.5 Market Concentration Rate Analysis

3.5.1 Competition Landscape Analysis

3.5.2 Concentration Ratio (CR3, CR5 and CR10) & (2024-2026)

3.6 New Products and Potential Entrants

3.7 Market M&A Activity & Strategy

4 WORLD HISTORIC REVIEW FOR HOUSEHOLD COUNTERTOP AND BUILT-IN INDUCTION COOKTOPS BY GEOGRAPHIC REGION

4.1 World Historic Household Countertop and Built-in Induction Cooktops Market Size by Geographic Region (2021-2026)

4.1.1 Global Household Countertop and Built-in Induction Cooktops Annual Sales by Geographic Region (2021-2026)

4.1.2 Global Household Countertop and Built-in Induction Cooktops Annual Revenue by Geographic Region (2021-2026)

4.2 World Historic Household Countertop and Built-in Induction Cooktops Market Size by Country/Region (2021-2026)

4.2.1 Global Household Countertop and Built-in Induction Cooktops Annual Sales by Country/Region (2021-2026)

4.2.2 Global Household Countertop and Built-in Induction Cooktops Annual Revenue by Country/Region (2021-2026)

4.3 Americas Household Countertop and Built-in Induction Cooktops Sales Growth

4.4 APAC Household Countertop and Built-in Induction Cooktops Sales Growth

4.5 Europe Household Countertop and Built-in Induction Cooktops Sales Growth

4.6 Middle East & Africa Household Countertop and Built-in Induction Cooktops Sales Growth

5 AMERICAS

5.1 Americas Household Countertop and Built-in Induction Cooktops Sales by Country

5.1.1 Americas Household Countertop and Built-in Induction Cooktops Sales by Country (2021-2026)

5.1.2 Americas Household Countertop and Built-in Induction Cooktops Revenue by Country (2021-2026)

5.2 Americas Household Countertop and Built-in Induction Cooktops Sales by Installation Method (2021-2026)

5.3 Americas Household Countertop and Built-in Induction Cooktops Sales by Sales Channel (2021-2026)

5.4 United States

5.5 Canada

5.6 Mexico

5.7 Brazil

6 APAC

6.1 APAC Household Countertop and Built-in Induction Cooktops Sales by Region

6.1.1 APAC Household Countertop and Built-in Induction Cooktops Sales by Region (2021-2026)

6.1.2 APAC Household Countertop and Built-in Induction Cooktops Revenue by Region (2021-2026)

6.2 APAC Household Countertop and Built-in Induction Cooktops Sales by Installation Method (2021-2026)

6.3 APAC Household Countertop and Built-in Induction Cooktops Sales by Sales Channel (2021-2026)

6.4 China

6.5 Japan

6.6 South Korea

6.7 Southeast Asia

6.8 India

6.9 Australia

6.10 China Taiwan

7 EUROPE

7.1 Europe Household Countertop and Built-in Induction Cooktops by Country

7.1.1 Europe Household Countertop and Built-in Induction Cooktops Sales by Country

(2021-2026)

7.1.2 Europe Household Countertop and Built-in Induction Cooktops Revenue by Country (2021-2026)

7.2 Europe Household Countertop and Built-in Induction Cooktops Sales by Installation Method (2021-2026)

7.3 Europe Household Countertop and Built-in Induction Cooktops Sales by Sales Channel (2021-2026)

7.4 Germany

7.5 France

7.6 UK

7.7 Italy

7.8 Russia

8 MIDDLE EAST & AFRICA

8.1 Middle East & Africa Household Countertop and Built-in Induction Cooktops by Country

8.1.1 Middle East & Africa Household Countertop and Built-in Induction Cooktops Sales by Country (2021-2026)

8.1.2 Middle East & Africa Household Countertop and Built-in Induction Cooktops Revenue by Country (2021-2026)

8.2 Middle East & Africa Household Countertop and Built-in Induction Cooktops Sales by Installation Method (2021-2026)

8.3 Middle East & Africa Household Countertop and Built-in Induction Cooktops Sales by Sales Channel (2021-2026)

8.4 Egypt

8.5 South Africa

8.6 Israel

8.7 Turkey

8.8 GCC Countries

9 MARKET DRIVERS, CHALLENGES AND TRENDS

9.1 Market Drivers & Growth Opportunities

9.2 Market Challenges & Risks

9.3 Industry Trends

10 MANUFACTURING COST STRUCTURE ANALYSIS

10.1 Raw Material and Suppliers

10.2 Manufacturing Cost Structure Analysis of Household Countertop and Built-in Induction Cooktops

10.3 Manufacturing Process Analysis of Household Countertop and Built-in Induction Cooktops

10.4 Industry Chain Structure of Household Countertop and Built-in Induction Cooktops

11 MARKETING, DISTRIBUTORS AND CUSTOMER

11.1 Sales Channel

11.1.1 Direct Channels

11.1.2 Indirect Channels

11.2 Household Countertop and Built-in Induction Cooktops Distributors

11.3 Household Countertop and Built-in Induction Cooktops Customer

12 WORLD FORECAST REVIEW FOR HOUSEHOLD COUNTERTOP AND BUILT-IN INDUCTION COOKTOPS BY GEOGRAPHIC REGION

12.1 Global Household Countertop and Built-in Induction Cooktops Market Size Forecast by Region

12.1.1 Global Household Countertop and Built-in Induction Cooktops Forecast by Region (2027-2032)

12.1.2 Global Household Countertop and Built-in Induction Cooktops Annual Revenue Forecast by Region (2027-2032)

12.2 Americas Forecast by Country (2027-2032)

12.3 APAC Forecast by Region (2027-2032)

12.4 Europe Forecast by Country (2027-2032)

12.5 Middle East & Africa Forecast by Country (2027-2032)

12.6 Global Household Countertop and Built-in Induction Cooktops Forecast by Installation Method (2027-2032)

12.7 Global Household Countertop and Built-in Induction Cooktops Forecast by Sales Channel (2027-2032)

13 KEY PLAYERS ANALYSIS

13.1 Midea Group Co., Ltd.

13.1.1 Midea Group Co., Ltd. Company Information

13.1.2 Midea Group Co., Ltd. Household Countertop and Built-in Induction Cooktops Product Portfolios and Specifications

- 13.1.3 Midea Group Co., Ltd. Household Countertop and Built-in Induction Cooktops Sales, Revenue, Price and Gross Margin (2021-2026)
- 13.1.4 Midea Group Co., Ltd. Main Business Overview
- 13.1.5 Midea Group Co., Ltd. Latest Developments
