The global Human Eye Wavefront Aberrometer market size is predicted to grow from US\$ 1201 million in 2025 to US\$ 1918 million in 2032; it is expected to grow at a CAGR of 7.1% from 2026 to 2032.

The human eye wavefront aberrometer is a high-precision eye aberration measurement and analysis instrument designed to measure the aberrations of the human eye. It consists of optoelectronic hardware and software and can quickly and effectively diagnose high- and low-order aberrations.

According to data from the International Society for Aesthetic Plastic Surgery (ISAPS), in 2021, the number of surgical plastic surgery procedures worldwide will be approximately 12.84 million, a year-on-year increase of 18.5%; the number of non-surgical plastic surgery procedures will be 18.6 million, a year-on-year increase of 19.9%. Among them, the top three countries with the most number of treatment courses are the United States, Brazil and Japan, with 7.35 million, 2.72 million and 1.75 million respectively. Judging from the number of plastic surgeons, the United States, Brazil and China have the largest number of physicians, accounting for 17%, 13.6% and 6.8% of the global total respectively. ASAPS data shows that the overall size of the U.S. medical beauty market in 2020 was US\$9.308 billion, a year-on-year increase of 14.63%. Among them, the market share of surgical aesthetics is US\$6.177 billion, accounting for 66.36%; the market size of non-surgical aesthetics is US\$3.131 billion, accounting for 33.64%. The U.S. medical aesthetic market is generally stable, and the market share of non-surgical aesthetic medicine continues to rise significantly. The penetration rate of China's medical aesthetics industry is low. Compared with mature markets such as Europe, the United States, Japan and South Korea, the industry as a whole still has much room for improvement. The "2021 Medical Beauty Industry White Paper"

released by SoYoung shows that the scale of China's medical beauty industry in 2021 will be approximately 184.6 billion, a year-on-year increase of 21.6%.
