Humidity control pack is a kind of high water-absorbing polymer, halogen-free, environmentally friendly, constant humidity sheet that can adjust the space humidity range. Different from previous desiccants, the material itself is reversible. It will absorb moisture in high-humidity environments and release moisture in low-humidity environments, adjusting the humidity to ensure stable humidity. This ensures its long-term, sustainable dehumidification effect. It can effectively deal with the occurrence of condensation, is not subject to environmental restrictions during installation, and is very simple to use.

The global Humidity Control Packs market size is projected to grow from US\$ million in 2024 to US\$ million in 2030; it is expected to grow at a CAGR of %from 2024 to 2030.
