The global Humira Biosimilar market size is predicted to grow from US\$ 573 million in 2025 to US\$ 1324 million in 2032; it is expected to grow at a CAGR of 13.0% from 2026 to 2032.

Humira is a tumor necrosis factor (TNF) blocker that reduces the effects of a substance in the body that can cause inflammation.

The introduction of Humira biosimilars is expected to increase competition in the market, leading to lower prices and improved access to treatment for patients. The availability of biosimilars provides an alternative option for healthcare providers and payers to choose from, potentially reducing the overall healthcare expenditure associated with biologic treatments.
