The global HVDC Transmission Commissioning Services market size is predicted to grow from US\$ 2403 million in 2025 to US\$ 3727 million in 2032; it is expected to grow at a CAGR of 6.5% from 2026 to 2032.

To address the fragmented processes, complex parameter adaptation, and high system commissioning risks inherent in traditional HVDC (High Voltage Direct Current) transmission commissioning, HVDC commissioning services emerged. Since their inception in the early 21st century, the power engineering commissioning field has experienced significant development. Currently, HVDC commissioning services encompass various types of services, including converter station subsystem commissioning, DC field whole-station commissioning, control and protection closed-loop testing, and new energy island access verification. These services are widely used in ultra-high voltage DC projects, flexible DC grids, cross-sea cable interconnections, and large-scale energy base transmission projects, significantly improving commissioning efficiency, system stability, and the ability to ensure on-time project commissioning.

United States market for HVDC Transmission Commissioning Services is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.
