The global Hydraulic Catwalk market size is predicted to grow from US\$ million in 2025 to US\$ million in 2032; it is expected to grow at a CAGR of %from 2026 to 2032.

The hydraulic power catwalk is one of the core equipment of the drilling rig pipe string handling system, which adopts hydraulic drive mode and can realize the automatic transportation of the pipe string between the pipe rack and the drilling floor during the drilling or workover process.

The hydraulic power catwalk has obvious advantages in improving the pipe string transportation efficiency, reducing the labor intensity of workers, increasing the safety of drilling tool transportation, and reducing the cost of drilling operations. This equipment is suitable for the automation and intelligent development of drilling equipment, and is suitable for the upgrading and transformation of existing drilling rigs and supporting new drilling rigs. The market prospect is broad.
