## Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

Hydrocephalus, known as 'water on the brain' is a disorder caused by the accumulation of cerebrospinal fluid in the cavities (ventricles) deep within the brain. This causes an increase in the size of the ventricles and pressure on the brain that leads to brain damage. Ventriculo-peritoneal valves are devices that drain the extra fluid from the brain into the peritoneal cavity, in the abdomen, where the fluid can be absorbed (a ventriculo-peritoneal shunt).

The global market for Hydrocephalus Valves is estimated to increase from US\$ million in 2021 to reach US\$ million by 2028, exhibiting a CAGR of % during 2022-2028. Keeping in mind the uncertainties of COVID-19 and Russia-Ukraine War, we are continuously tracking and evaluating the direct as well as the indirect influence of the pandemic on different end use sectors. These insights are included in the report as a major market contributor.
